

## TORQUE-TEK ACTUATION GUN

# Simplified Actuation for Manually Operated Valves

The DSS Torque-Tek Actuation Gun is a powerful accessory that works with all DSS Knife Gate Valves with handwheels or gear operators. Torque-Tek speeds up the opening and closing process by easily attaching to any DSS Valve with no retrofitting required. It then quickly and safely actuates the valve for the operator with either pneumatic or battery operated design.

Torque-Tek was designed with efficiency in mind. It provides quick and easy actuation for large diameter valves that can take hours to operate, tedious projects with many small valves, and/or remote locations with few human operators.

**DSS Torque-Tek is available in the following options:**

- Slow Pneumatic
- Fast Pneumatic
- Battery Operated

## Problems We've Solved with the DSS Torque-Tek Actuation Gun

### **PROBLEM:**

Operator Safety and Productivity

### **SOLUTION:**

Torque-Tek offers a safe, easy-to-use option for operators. No more hard labour in hard to reach spots that could compromise the health or safety of your team! They'll be able to get more done, in less time.

### **PROBLEM:**

Valve Longevity

### **SOLUTION:**

The gun makes actuation of the valve smooth and clean, similar to an electric actuator, which increases the service life.
